

Product Name :
Grease Worker Hand Operated

Product Code :
TEST5080RFQLAB-0008

Description :

Grease Worker Hand Operated

Technical Specification :

It is used for working the grease. It can also be used as a container when measuring the penetration of petrolatum.

It consists of a worker pot in brass casting, a workertop and a perforated plate fixed to a rod which moves freely in the worker top. All the above are fixed to a rod which moves freely through the top plate.
