

Product Name :
Benkelman Beam Flexible

Product Code :
TEST5089RFQLAB-0002

Description :

Benkelman Beam Flexible for Testing Lab Equipment Tender Suppliers India

Technical Specification :

The apparatus consists of a 365 cm long aluminium beam in two halves arranged to give the lever arm ratio of 2:1. Provision is made for levelling the apparatus. An anvil and a probe are fixed in opposite directions on the beam. A buzzer is provided for removing friction in the bearings. For movement of the assembled beam to different test points on the same pavement and clamping, spring loaded clamp is provided. The beam can be levelled by fine and coarse adjustments provided for the purpose.

We are a leading manufacturers of Benkelman Beam Flexible testing equipment for a range of industries, including materials science testing lab. We offer full range of Benkelman Beam Flexible testing equipment, including Benkelman Beam Flexible testing kit, Benkelman Beam Flexible testing machine, Benkelman Beam Flexible testing tools, Benkelman Beam Flexible test equipment, Benkelman Beam Flexible test machines, Benkelman Beam Flexible for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Benkelman Beam Flexible testing equipment that helps customers build better, safer, and more sustainable infrastructure.
