

Product Name :
Volume Change Apparatus

Product Code :
TEST5056RFQLAB-0009

Description :

Volume Change Apparatus

Technical Specification :

It is used for determination of volume change of set cement concrete.

The apparatus comprises the following :-

One frame consisting of a base, two pillars and a cross bar.

One dial gauge 0.002 mm x 5 mm travel.

One specimen mould for 100 mm x 100 mm x 250 mm effective gauge length with four stainless steel studs.

One stainless steel reference bar.

We are a leading manufacturers of Volume Change Apparatus testing equipment for a range of industries, including materials science testing lab. We offer full range of Volume Change Apparatus testing equipment, including Volume Change Apparatus testing kit, Volume Change Apparatus testing machine, Volume Change Apparatus testing tools, Volume Change Apparatus test equipment, Volume Change Apparatus test machines, Volume Change Apparatus for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Volume Change Apparatus testing equipment that helps customers build better, safer, and more sustainable infrastructure.
