

Product Name :
Air Compressor

Product Code :
TEST5066RFQLAB-0003

Description :

Air Compressor for Testing Lab Equipment Tender Suppliers India

Technical Specification :

It is a two stage compressor for developing high pressure upto 20 kg/sq.cm. It has a large air tank. Complete with ON-OFF switch, a pressure switch, safety valve, pressure gauge and one pressure outlet valve. Suitable for operation on 440 v, 3 phase, 50 Hz supply. Other electrical specifications available on request.

Air compressor required for the application of pressure in Cement Mortar and concrete permeability apparatus is not supplied with the apparatus but can be had at extra cost as an accessory.

We are a leading manufacturers of Air Compressor testing equipment for a range of industries, including materials science testing lab. We offer full range of Air Compressor testing equipment, including Air Compressor testing kit, Air Compressor testing machine, Air Compressor testing tools, Air Compressor test equipment, Air Compressor test machines, Air Compressor for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Air Compressor testing equipment that helps customers build better, safer, and more sustainable infrastructure.
