

Product Name :
Sand Absorption Cone and Tamper

Product Code :
TEST5067RFQLAB-0010

Description :

Sand Absorption Cone and Tamper

Technical Specification :

For determining the slump of fine aggregate in estimation of absorption of fine aggregate.

It consists of the following :-

A metal mould in the form of frustum of a cone 40 mm dia at the top, 90 mm dia at the bottom and 73 mm in height.

A metal tamper having a flat circular tamping face 25 mm dia and weighing 340 g approximately.

We are a leading manufacturers of Sand Absorption Cone and Tamper testing equipment for a range of industries, including materials science testing lab. We offer full range of Sand Absorption Cone and Tamper testing equipment, including Sand Absorption Cone and Tamper testing kit, Sand Absorption Cone and Tamper testing machine, Sand Absorption Cone and Tamper testing tools, Sand Absorption Cone and Tamper test equipment, Sand Absorption Cone and Tamper test machines, Sand Absorption Cone and Tamper for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Sand Absorption Cone and Tamper testing equipment that helps customers build better, safer, and more sustainable infrastructure.
