

Product Name :
Deval Attrition Testing Machine

Product Code :
TEST5067RFQLAB-0011

Description :

Deval Attrition Testing Machine

Technical Specification :

For determining the abrasion value of coarse aggregate.

It consists of the following :-

Two hollow cast iron cylinders closed at one end and fitted with tightly fitting covers at the other and mounted on a shaft at an angle of 30o to the axis of the shaft. The cylinders are of 20 cm internal diameter and 34 cm deep.

A shaft adjusted to rotate at 30-33 rpm by reduction gear mechanism operated by a motor.

A revolution counter. Suitable for operation on 440 V, 50 Hz, 3 phase supply.

We are a leading manufacturers of Deval Attrition Testing Machine testing equipment for a range of industries, including materials science testing lab. We offer full range of Deval Attrition Testing Machine testing equipment, including Deval Attrition Testing Machine testing kit, Deval Attrition Testing Machine testing machine, Deval Attrition Testing Machine testing tools, Deval Attrition Testing Machine test equipment, Deval Attrition Testing Machine test machines, Deval Attrition Testing Machine for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Deval Attrition Testing Machine testing equipment that helps customers build better, safer, and more sustainable infrastructure.
