

Product Name :
Aggregate Impact Test Apparatus with Counter

Product Code :
TEST5067RFQLAB-0014

Description :

Aggregate Impact Test Apparatus with Counter

Technical Specification :

Required for determining the Impact Value of coarse aggregate.

It consists of the following :-

Fitted with an automatic blow counter.

A heavy circular base with two vertical guides fitted with a cross bar at the top.

A hammer of 13.75 kg mass which can be raised and allowed to fall freely through 380 +5 mm with locking arrangement.

A cylindrical cup, a metal measure and a tamping rod 10 mm dia x 230 mm long.

We are a leading manufacturers of Aggregate Impact Test Apparatus with Counter testing equipment for a range of industries, including materials science testing lab. We offer full range of Aggregate Impact Test Apparatus with Counter testing equipment, including Aggregate Impact Test Apparatus with Counter testing kit, Aggregate Impact Test Apparatus with Counter testing machine, Aggregate Impact Test Apparatus with Counter testing tools, Aggregate Impact Test Apparatus with Counter test equipment, Aggregate Impact Test Apparatus with Counter test machines, Aggregate Impact Test Apparatus with Counter for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Aggregate Impact Test Apparatus with Counter testing equipment that helps customers build better, safer, and more sustainable infrastructure.
