

Product Name :
Remote Controlled Jacks with Lock Nut

Product Code :
TEST5068RFQLAB-0002

Description :

Remote Controlled Jacks with Lock Nut for Testing Lab Equipment Tender Suppliers India

Technical Specification :

These Jacks are similar to remote controlled hydraulic jacks described earlier, but their rams are threaded and provided with a lock nut. After lifting the load the lock nut is so adjusted that it rests firmly on the top of the cylinder and the whole load is taken up by the cylinder, thus eliminating any possibility of its coming down in case of accidental failure of the hydraulic mechanism or seal of the jack.

This also enables the holding up the load for long duration without straining the hydraulic system and ensures the safety of workers working underneath supported heavy structures like, heavy beams, launching girders of bridges, supported structures in tunnels etc.

We are a leading manufacturers of Remote Controlled Jacks with Lock Nut testing equipment for a range of industries, including materials science testing lab. We offer full range of Remote Controlled Jacks with Lock Nut testing equipment, including Remote Controlled Jacks with Lock Nut testing kit, Remote Controlled Jacks with Lock Nut testing machine, Remote Controlled Jacks with Lock Nut testing tools, Remote Controlled Jacks with Lock Nut test equipment, Remote Controlled Jacks with Lock Nut test machines, Remote Controlled Jacks with Lock Nut for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Remote Controlled Jacks with Lock Nut testing equipment that helps customers build better, safer, and more sustainable infrastructure.
