

Product Name :
Motorised Pumping Units

Product Code :
TEST5068RFQLAB-0006

Description :

Motorised Pumping Units

Technical Specification :

All hydraulic jacks described above are provided with hand operated pumping units as standard. Our motorised pumping units can be used with remote controlled jacks when used in the laboratory or at a place where power supply is available. Each unit is provided with a pressure gauge and a manually operated valve to control the rate of loading. Operates on 440 v, 50 Hz, 3 phase supply. Multi-Control Type Motorised Pumping Unit Multi-control versions of motorised pumping units These will operate a gang of jacks where distributed loading is desirable. They can be designed to operate from one to 12 jacks simultaneously or individually. Each jack is provided with an isolating valve, pressure gauge and pressure line. A load control valve is provided in the pumping unit. Suitable for operation on 440 v, 50 Hz, 3 phase supply.

We are a leading manufacturers of Motorised Pumping Units testing equipment for a range of industries, including materials science testing lab. We offer full range of Motorised Pumping Units testing equipment, including Motorised Pumping Units testing kit, Motorised Pumping Units testing machine, Motorised Pumping Units testing tools, Motorised Pumping Units test equipment, Motorised Pumping Units test machines, Motorised Pumping Units for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Motorised Pumping Units testing equipment that helps customers build better, safer, and more sustainable infrastructure.

All the pressure gauges provided with the jacks are direct load reading type and calibrated at our works against standard proving rings test by National Physical Laboratory or.

Jacks as per customer's specification can also be manufactured and supplied.

Pumping units suitable for operation on 220v, 50 Hz, single phase supply can also be manufactured if specially ordered.

Separate load gauges and flexible hoses can be supplied for all types of jacks at extra cost.

We are a leading manufacturers of Motorised Pumping Units testing equipment for a range of industries, including materials science testing lab. We offer full range of Motorised Pumping Units testing equipment, including Motorised Pumping Units testing kit, Motorised Pumping Units testing machine, Motorised Pumping Units testing tools, Motorised Pumping Units test equipment, Motorised Pumping Units test machines, Motorised Pumping Units for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Motorised Pumping Units testing equipment that helps customers build better, safer, and more sustainable infrastructure.
