

Product Name :
Rock Classification Hammer

Product Code :
TEST5048RFQLAB-0006

Description :

Rock Classification Hammer

Technical Specification :

This light weight and portable compact hammer is used for rock classification test. Cylindrical cores, usually 'NX' size are held in horizontal position and the hammer mechanism impacted against the core to obtain rebound value. A series of rebound values are taken along the length of the core or rock mass to obtain average value.

We are a leading manufacturers of Rock Classification Hammer testing equipment for a range of industries, including materials science testing lab. We offer full range of Rock Classification Hammer testing equipment, including Rock Classification Hammer testing kit, Rock Classification Hammer testing machine, Rock Classification Hammer testing tools, Rock Classification Hammer test equipment, Rock Classification Hammer test machines, Rock Classification Hammer for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Rock Classification Hammer testing equipment that helps customers build better, safer, and more sustainable infrastructure.
