

Product Name :
Sand Density Cone

Product Code :
TEST5006RFQLAB-0004

Description :

Sand Density Cone

Technical Specification :

Used for the determination of in-situ density of soils containing particles not greater than 2 inch in diameter. The equipment consists of a brass cone provided with flange at the bottom and a valve at the top. It is provided with another cone at the top of the valve with arrangement to attach a standard plastic sand jug. Supplied complete with a density plate and one sand jug with an adapter for attaching the standard plastic sand jug.

We are a leading manufacturers of Sand Density Cone testing equipment for a range of industries, including materials science testing lab. We offer full range of Sand Density Cone testing equipment, including Sand Density Cone testing kit, Sand Density Cone testing machine, Sand Density Cone testing tools, Sand Density Cone test equipment, Sand Density Cone test machines, Sand Density Cone testing Instruments. We are suppliers of materials testing tools equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Sand Density Cone testing equipment that helps customers build better, safer, and more sustainable infrastructure.
