

Product Name :
Compressor

Product Code :
TEST5018RFQLAB-0003

Description :

Compressor for Testing Lab Equipment Tender Suppliers India

Technical Specification :

In busy laboratories, where several pressure outlets are needed for different tests, the use of central air compressor is very economical. Using pressure regulators (supplied on order) desired regulated pressures can be tapped out from the same compressor maintaining pressure slightly more than the desired test pressures.

Compressor – Single Stage

Compressor of cfm. It can create max pressure of 1000kPa. Operates on 220 volts single phase supply.

De-airing system with vacuum arrangement

It has a vacuum regulator, 20 liter water chamber and additional line for vacuum and vacuum gauge. Single stage. Pressure range 0 – (-)100kPa

We are a leading manufacturers of Compressor testing equipment for a range of industries, including materials science testing lab. We offer full range of Compressor testing equipment, including Compressor testing kit, Compressor testing machine, Compressor testing tools, Compressor test equipment, Compressor test machines, Compressor for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Compressor testing equipment that helps customers build better, safer, and more sustainable infrastructure.
