Product Name :
Bender Element Testing System

Product Code :
TEST5020RFQLAB-0009

Description :

Bender Element Testing System

Technical Specification :

Bender Element Test Set up system comprises of
Triaxial Cell with bender element for sample size 50 mm diameter (optional 75mm & 100mm)
Dual channel digital oscilloscope
Function Generator
Amplifier for the wave form.

We are a leading manufacturers of Bender Element Testing System testing equipment for a range of industries, including materials science testing lab. We offer full range of Bender Element Testing System testing equipment, including Bender Element Testing System testing kit, Bender Element Testing System testing machine, Bender Element Testing System testing tools, Bender Element Testing System test equipment, Bender Element Testing System test machines, Bender Element Testing System for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Bender Element Testing System testing equipment that helps customers build better, safer, and more sustainable infrastructure.
