

Product Name :
Dual Channel Function Generator

Product Code :
TEST5020RFQLAB-0012

Description :

Dual Channel Function Generator

Technical Specification :

Dual channel wave form generators adopt direct digital synthesis technology, which enables to generate stable high precision pure and low distribution signals.

Main feature are :-

Adopts advance DDS technology, dual channel output, 100 MSa/s sampling rate, 14 bit vertical resolution.

Output 5 standard wave forms.

Standard configuration interfaces, USB device and USB host.

Powerful arbitrary waveform editing software. Company loaded.

We are a leading manufacturers of Dual Channel Function Generator testing equipment for a range of industries, including materials science testing lab. We offer full range of Dual Channel Function Generator testing equipment, including Dual Channel Function Generator testing kit, Dual Channel Function Generator testing machine, Dual Channel Function Generator testing tools, Dual Channel Function Generator test equipment, Dual Channel Function Generator test machines, Dual Channel Function Generator for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Dual Channel Function Generator testing equipment that helps customers build better, safer, and more sustainable infrastructure.
