

Product Name :
Amplifier

Product Code :
TEST5020RFQLAB-0013

Description :

Amplifier

Technical Specification :

The wave is travelling from the emitter piezo sensor to the receiver piezo sensor and is travelling through a comparatively loose medium the signal received is very weak. To have a better representative wave form on the oscilloscope screen this amplifier is used between the receiver piezo sensor and the oscilloscope.

We are a leading manufacturer of Amplifier testing equipment for a range of industries, including materials science testing lab. We offer full range of Amplifier testing equipment, including Amplifier testing kit, Amplifier testing machine, Amplifier testing tools, Amplifier test equipment, Amplifier test machines, Amplifier for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Amplifier testing equipment that helps customers build better, safer, and more sustainable infrastructure.
