

Product Name :
Data Acquisition System

Product Code :
TEST5028RFQLAB-0005

Description :

Data Acquisition System

Technical Specification :

The data acquisition system has been designed to be used with any of the above cones. It has I.P. 65 protection and has a serial communication port to be used with standard Laptop.

Software for Piezo cone

Supporting software for Piezo cone operates in windows. It is used friendly and can be used for reporting. All plotting is done on x – t basis.

Features of the software are :-

- Cone resistance
- Local sleeve friction
- Pore pressure
- Total load

We are a leading manufacturers of Data Acquisition System testing equipment for a range of industries, including materials science testing lab. We offer full range of Data Acquisition System testing equipment, including Data Acquisition System testing kit, Data Acquisition System testing machine, Data Acquisition System testing tools, Data Acquisition System test equipment, Data Acquisition System test machines, Data Acquisition System for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Data Acquisition System testing equipment that helps customers build better, safer, and more sustainable infrastructure.
