

Product Name :
Load Truss 200 kN 20 Tonne Capacity

Product Code :
TEST5030RFQLAB-0002

Description :

Load Truss 200 kN 20 Tonne Capacity, Load Truss 300 kN (30 tonne) Capacity, Load truss 500 kN (50 tonne) Capacity

Technical Specification :

The load truss provides necessary reaction for loading bearing plates. The truss is of fabricated R.S.J. construction in two halves which can be easily assembled together at site.

The equipment consists of :-

Truss in two parts.

Two joists.

Eight anchors.

Beams – 2Nos.

Anchor & Bolts (as per load capacity)

Eight joining bolts with nuts.

Set of tools for assembly and set up.

Reaction loading of 300 kN or 30 tonnes. Supplied with twelve anchorage and 130 spikes.

Reaction loading of 500 kN or 50 tonnes. Supplied with sixteen anchorages and 170 spikes.

OVENS

Oven drying method is the standard method for the determination of moisture content of soils and aggregates. The temperature of the specimen is to be maintained between 1050 and 1100. manufactures a range of thermostatically controlled ovens for working within the range of ambient to 2500. The maximum variation in the

set temperature is $\pm 10\text{C}$.

We are a leading manufacturers of Load Truss 200 kN 20 Tonne Capacity testing equipment for a range of industries, including materials science testing lab. We offer full range of Load Truss 200 kN 20 Tonne Capacity testing equipment, including Load Truss 200 kN 20 Tonne Capacity testing kit, Load Truss 200 kN 20 Tonne Capacity testing machine, Load Truss 200 kN 20 Tonne Capacity testing tools, Load Truss 200 kN 20 Tonne Capacity test equipment, Load Truss 200 kN 20 Tonne Capacity test machines, Load Truss 200 kN 20 Tonne Capacity for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Load Truss 200 kN 20 Tonne Capacity testing equipment that helps customers build better, safer, and more sustainable infrastructure.
