

Product Name :
Point Load Tester Tubular Type

Product Code :
TEST5039RFQLAB-0001

Description :

Point Load Tester Tubular Type for Testing Lab Equipment Tender Suppliers India

Technical Specification :

Introduction

Point Load Test is primarily an index test for strength classification of rock material. The apparatus meets the essential requirements. The light weight and compact design (tubular frame) makes it highly portable. Though intended for field measurements, it can also be used for laboratory testing. The frame can take irregular specimens of maximum dimensions 100 mm x 100 mm and cores of 100 mm dia.

The equipment comprises :-

Tubular frame

Load gauge 200 mm diameter, 25 kN capacity supplied in carrying case.

Load Gauge 200 mm diameter, 100 kN capacity supplied in carrying case.

Rigid hose pipe with quick couplings.

We are a leading manufacturers of Point Load Tester Tubular Type testing equipment for a range of industries, including materials science testing lab. We offer full range of Point Load Tester Tubular Type testing equipment, including Point Load Tester Tubular Type testing kit, Point Load Tester Tubular Type testing machine, Point Load Tester Tubular Type testing tools, Point Load Tester Tubular Type test equipment, Point Load Tester Tubular Type test machines, Point Load Tester Tubular Type for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Point Load Tester Tubular Type testing equipment that helps customers build better, safer, and

more sustainable infrastructure.
