

Product Name :
Wet Wheel Abrasion Testing Machine

Product Code :
TEST5123RFQLAB-0001

Description :

Wet Wheel Abrasion Testing Machine for Testing Lab Equipment Tender Suppliers India

Technical Specification :

Abrasion tester is intended for testing the compatibility and water detrimental resistance of slurry surfacing mixtures after molding. The abrasion tester can help to obtain the best estimate of bitumen content together with wheel tracker test.

Technical Parameters

Rotating speed of electric motor: 1400RPM

Auto-rotation rate of wheel head: 140RPM

Revolution rate of wheel head: 61RPM

Weight of wheel head: 2.27kg

Length of rubber hose for wheel head: 127mm

Timing: 5min

Power: AC 380V, 50Hz, 380W (3-phase 4-wire system, with zero line)

We are a leading manufacturers of Wet Wheel Abrasion testing equipment for a range of industries, including materials science testing lab. We offer full range of Wet Wheel Abrasion testing equipment, including Wet Wheel Abrasion testing kit, Wet Wheel Abrasion testing machine, Wet Wheel Abrasion testing tools, Wet Wheel Abrasion test equipment, Wet Wheel Abrasion test machines, Wet Wheel Abrasion for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Wet Wheel Abrasion testing equipment that helps customers build better,

safer, and more sustainable infrastructure.
