

**Product Name :**  
Softening Point Machine

**Product Code :**  
TEST5109RFQLAB-0003

**Description :**

Softening Point Machine

**Technical Specification :**

Softening point apparatus is used to determine the softening point of bituminous materials such as petroleum asphalts, coal pitch, and liquid petroleum asphalt.

The softening point apparatus is an ideal choice for asphalt manufacturing companies, highway and bridge construction companies, labs, universities, etc.

Ring: Height is 6.4mm; upper aperture is 19.8mm; lower aperture is 15.9mm

Ball: Diameter is 9.5mm; weight is (3.50±0.05)g

Ball locating ring: Inner ring is 23.0mm; center is 9.55mm

Test method: 2 samples, parallel test

Support plate: 25.4mm from bottom

Vessel: 1000ml beaker

Thermometer: Mercury-in-glass thermometer, range from 30? to 180?; division is 0.5?

We are a leading manufacturers of Softening Point Apparatus testing equipment for a range of industries, including materials science testing lab. We offer full range of Softening Point Apparatus testing equipment, including Softening Point Apparatus testing kit, Softening Point Apparatus testing machine, Softening Point Apparatus testing tools, Softening Point Apparatus test equipment, Softening Point Apparatus test machines, Softening Point Apparatus for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Softening Point Apparatus testing equipment that helps customers build better, safer, and more sustainable infrastructure.
