

Product Name :
Engler Viscometer

Product Code :
TEST5081RFQLAB-0011

Description :

Engler Viscometer

Technical Specification :

Engler viscometer is used to determine the rate of time (seconds) of liquid flow out and time (seconds) of distilled water flow out at 20°, under a certain temperature and certain cubage. The unit of measure is Engler degree and Engler viscosity is expressed in Engler degrees.

Technical Parameters

Power: AC (220±10%)V, 50Hz

Maximum power consumption: 1200W

Standard water value: $K_{20}=(51\pm 1)s$ (for asphalt: $\times 0.224$)

Temperature set range: 20°~100°

Temperature controlling: (20±0.1)°, (25±0.1)°

Temperature control accuracy: ±0.1°

Ambient temperature: 15°~28°

Relative humidity: ?85%

We are a leading manufacturers of Engler Viscometer testing equipment for a range of industries, including materials science testing lab. We offer full range of Engler Viscometer testing equipment, including Engler Viscometer testing kit, Engler Viscometer testing machine, Engler Viscometer testing tools, Engler Viscometer test equipment, Engler Viscometer test machines, Engler Viscometer for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Engler Viscometer testing equipment that helps customers build better, safer, and

more sustainable infrastructure.
