Product Name :
Geo-Synthetic Universal Testing Machine

Product Code :
TEST5092RFQLAB-0003

Description :

Geo-Synthetic Universal Testing Machine

Technical Specification :

Geo-synthetic (Geotextile, Geomembrane, Geogrid, Geonet etc.) material testing in tension as well compression Suitable to conduct Grab, Puncture, Tearing, CBR Push through, wide width Tensile tests conforming to testing procedure laid down in ASTM, BS, EN, ISO standards

Also suitable to conduct tensile/ compression/ bend test on different materials such as Metals, Rubbers, Cables, Fabrics, Tapes, Thread, Plastic etc.

We are a leading manufacturers of Geo-Synthetic Universal testing equipment for a range of industries, including materials science testing lab. We offer full range of Geo-Synthetic Universal testing equipment, including Geo-Synthetic Universal testing kit, Geo-Synthetic Universal testing machine, Geo-Synthetic Universal testing tools, Geo-Synthetic Universal test equipment, Geo-Synthetic Universal test machines, Geo-Synthetic Universal for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Geo-Synthetic Universal testing equipment that helps customers build better, safer, and more sustainable infrastructure.
