Product Name :
Universal Testing Shear Machine

Product Code :
TEST5092RFQLAB-0004

Description :

Universal Testing Shear Machine

Technical Specification :

UTM is suitable to conduct following tests –

Compression

Tension

Transverse

Bending

Shear

Hardness and many others on various types of ferrous and non-ferrous materials conforming to testing procedure laid down in IS/ ASTM etc. standards. range of UTM's are available in following models-

Electronic Universal Testing Machine with open crosshead and front loading jaws

Fully Automatic Servo Controlled Universal Testing Machine with hydraulically operated open crosshead and front loading jaws

We are a leading manufacturers of Universal Testing Shear testing equipment for a range of industries, including materials science testing lab. We offer full range of Universal Testing Shear testing equipment, including Universal Testing Shear testing kit, Universal Testing Shear testing machine, Universal Testing Shear testing tools, Universal Testing Shear test equipment, Universal Testing Shear test machines, Universal Testing Shear for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Universal Testing Shear testing equipment that helps customers build better, safer, and more sustainable infrastructure.
