

Product Name :
Concrete Water Permeability Testing Machine Digital
Display

Product Code :
TEST5134RFQLAB-0002

Description :

Concrete Water Permeability Testing Machine Digital Display for Testing Lab Equipment Tender Suppliers India

Technical Specification :

Concrete Water Permeability Testing Machine Digital Display is mainly used for the impermeability test of concrete and the determination of the impermeability grade. It can also be used to test and inspect building material permeability and quality, which is widely applied to production, construction, design, teaching and research departments.

Max. working pressure: 4MPa

Working way: Automatic voltage regulator, manual voltage regulator

Test specimen in one time: 6 pcs

Specimen dimension

Mold cavity upper diameter: ?174.8mm

Mold cavity lower diameter: ?185mm

Height: 153mm

Flow of piston pump: 0.16L/min

Motor power: 120W, 380V-50HZ

We are a leading manufacturers of Concrete Water Permeability Testing Machine Digital Display testing equipment for a range of industries, including materials science testing lab. We offer full range of Concrete Water Permeability Testing Machine Digital Display testing equipment, including Concrete Water Permeability Testing Machine Digital Display testing kit, Concrete Water Permeability Testing Machine Digital Display testing

machine, Concrete Water Permeability Testing Machine Digital Display testing tools, Concrete Water Permeability Testing Machine Digital Display test equipment, Concrete Water Permeability Testing Machine Digital Display test machines, Concrete Water Permeability Testing Machine Digital Display for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Concrete Water Permeability Testing Machine Digital Display testing equipment that helps customers build better, safer, and more sustainable infrastructure.
