

Product Name :
300KN Compression and Flexural Testing Machine

Product Code :
TEST5144RFQLAB-0002

Description :

300KN Compression and Flexural Testing Machine for Testing Lab Equipment Tender Suppliers India

Technical Specification :

Compression and flexural testing machine is designed with dual testing chamber, incorporated with two independent load cells for measurement.

It is driven by hydraulic system which is close-loop controlled by computer servo technology.

Accuracy class: 1

Capacity(compression): 300KN

Capacity(bending): 10KN

Compression space(bending): 180mm

Piston stroke(bending): 60mm

Compression space(compression): 180mm

Piston stroke(compression): 80mm

Size of compression plates: ?120mm

Main unit

Industrial PC

Wireless keyboard and mouse

Printer

Operation manual

Certificate of quality

40*40mm compression jig

40*40*160mm flexural jig

We are a leading manufacturers of 300KN Compression and Flexural testing equipment for a range of industries, including materials science testing lab. We offer full range of 300KN Compression and Flexural testing equipment, including 300KN Compression and Flexural testing kit, 300KN Compression and Flexural testing machine, 300KN Compression and Flexural testing tools, 300KN Compression and Flexural test equipment, 300KN Compression and Flexural test machines, 300KN Compression and Flexural for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use 300KN Compression and Flexural testing equipment that helps customers build better, safer, and more sustainable infrastructure.
