

Product Name :
Fatigue Testing Machine Dynamic Test

Product Code :
TEST5158RFQLAB-0001

Description :

Fatigue Testing Machine Dynamic Test for Testing Lab Equipment Tender Suppliers India

Technical Specification :

Fatigue testing machine is intended for dynamic test, cyclic life test at ambient temperature and other fatigue tests for various springs (high strength, high stress, special materials) and elastic components.

Frequency: 1-5Hz

Amplitude: 0-±50mmmm (can be customized)

Stroke: 0-100mm (can be customized)

Counter capacity: 9×10⁹ times

Spring diameter: OD??90mm

Free length of spring: 150mm

Vertical test space: 200mm (can be customized)

Size of working table: Designed as spring size and working position

Position number: Two-station, three-station, four-station, multi-station

Working power: 380V, 50Hz

Power of main power: 8kW

We are a leading manufacturers of Fatigue Testing Machine Dynamic testing equipment for a range of industries, including materials science testing lab. We offer full range of Fatigue Testing Machine Dynamic testing equipment, including Fatigue Testing Machine Dynamic testing kit, Fatigue Testing Machine Dynamic testing machine, Fatigue Testing Machine Dynamic testing tools, Fatigue Testing Machine Dynamic test equipment, Fatigue Testing Machine Dynamic test machines, Fatigue Testing Machine Dynamic for Lab Testing

Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Fatigue Testing Machine Dynamic testing equipment that helps customers build better, safer, and more sustainable infrastructure.
