

Product Name :
Rebar Corrosion Electrode Detector

Product Code :
TEST5163RFQLAB-0002

Description :

Rebar Corrosion Electrode Detector for Testing Lab Equipment Tender Suppliers India

Technical Specification :

By using the electrode polarization theory, rebar corrosion detector tests the potential of concrete surfaces through reference electrode, and determines the level of rebar corrosion with the commonly used natural potential method.

Measuring range: $\pm 1000\text{mV}$

Accuracy: 0.1mV

Power: Built-in chargeable lithium battery, standby time >40 hours

Data storage: 234 points

Screen: $160 \times 128\text{mm}$ LCD

Electrode size: $30 \times 180\text{mm}$

Test area: 234m^2

We are a leading manufacturers of Rebar Corrosion Electrode Detector testing equipment for a range of industries, including materials science testing lab. We offer full range of Rebar Corrosion Electrode Detector testing equipment, including Rebar Corrosion Electrode Detector testing kit, Rebar Corrosion Electrode Detector testing machine, Rebar Corrosion Electrode Detector testing tools, Rebar Corrosion Electrode Detector test equipment, Rebar Corrosion Electrode Detector test machines, Rebar Corrosion Electrode Detector for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Rebar Corrosion Electrode Detector testing equipment that helps customers build better, safer, and more sustainable infrastructure.
