

Product Name :
Portable Compactor

Product Code :
TEST5167RFQLAB-0002

Description :

Portable Compactor for Testing Lab Equipment Tender Suppliers India

Technical Specification :

Portable compactor is used to determine the relationship between soil density and water content, to determine the maximum dry density and the corresponding optimum water content.

The instrument is both available in light and heavy modes, and the hammer weight can be changed from 2.5Kg to 4.5Kg.

Hammer weight and drop height can be adjusted to suit different test requirements.

Technical Parameters

Hammer mass: 2.5kg or 4.5kg optional

drop : 305mm or 457mm optional

Mold dimension: 102mm x 116mm, 152mm x 116mm

We are a leading manufacturers of Portable Compactor testing equipment for a range of industries, including materials science testing lab. We offer full range of Portable Compactor testing equipment, including Portable Compactor testing kit, Portable Compactor testing machine, Portable Compactor testing tools, Portable Compactor test equipment, Portable Compactor test machines, Portable Compactor for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Portable Compactor testing equipment that helps customers build better, safer, and more sustainable infrastructure.
