

**Product Name :**  
Paint Gloss Meter

**Product Code :**  
TEST5176RFQLAB-0024

**Description :**

Paint Gloss Meter

**Technical Specification :**

Paint Gloss Meter

High Gloss

Surfaces with a brilliant or highly polished finish reflect images clearly. This distinct reflection is caused by the incident light reflecting on the surface in a specular direction.

Semi & Matt Gloss.

Semi and matt surfaces reflect images less distinctly and with reduced intensity. On semi or matt surfaces light not only reflects in a specular direction but also is scattered causing the reflected image to appear diffused.

Features:

Elegant Design combined with aesthetics and ergonomics;

With auto-calibration function;

Auto Power-off.

Specifications:

Measuring Angle: 20o 60o 85o

Measuring area:

20o: 0- 2000GU

60o: 0- 1000GU

85o: 0-160GU

---

Division value: 0.1GU

Measuring Modes: Basic Mode; Statistics Mode, Continuous mode and QC Mode

Measuring Time: 0.5 seconds

Repeatability: 0~100GU $\pm$  0.2GU; 100~2000gu  $\pm$ 0.2%GU

Interface USB and Bluetooth

PC Software: for printing testing report with extended functions

Calibration: Auto calibration

Operation temperature: 0 - 400C

Accessories:

USB cable, user manual, calibration plate,

QC software

Miniature printer.
