

Product Name :
Domestic Refrigerator

Product Code :
TEST5182RFQLAB-0001

Description :

Domestic Refrigerator for Testing Lab Equipment Tender Suppliers India

Technical Specification :

Domestic refrigerator

The 5-Step anti bacterial deodorization removes bacteria up to 99.99%* and also minimizes bad odor in the refrigerator.

A newly designed dispenser display that adds to the elegance of your refrigerator.

The water tank's lid has an intelligent design so that you can easily pour water. The container box also has a generous 4 liter capacity, so that you can fill the tank less often. Excess moisture from food evaporates and then condenses on the lattice instead of puddling around your food, thus maintaining the right balance of moisture in the box.

Side by side refrigerator

Refrigerator and freezer

About 500 Ltr in total

cold water and ice dispenser

Color (silver)

(smart)

Stainless body

R-600a

With ice and cold water dispenser

Dual linear compressor
