Product Name : Large Shear Testing Machin

Product Code : TEST5194RFQLAB-0021

Description :

Large Shear Testing Machine

Technical Specification :

Large Shear testing machine Sample size: up to 300 mm square. Can be reduced to 150 mm sample insert for 300 mm shearbox Shear and vertical force: 100 kN Speed range: infinitely variable from 0.00001 to 11.00000 mm/min Max. travel: 75 mm Consolidation steps: up to 50 Automatic test management from consolidation to failure: the operator is only requested to remove the clamping screws of the shear box Straight connection between shear box, drive unit and load cell for the axial transmission of the horizontal force along the shearing plane, instead of the classic "swan neck" Easy and immediate set up of the test parameters via the large digital graphic display Possibility to set different speeds and travel (forward and reverse) in the residual shear tests Each single step of axial force can be applied instantaneously or by means of a linear ramp in a pre-set time interval. Data acquisition: RS-232 serial port for use with direct nd residual geo-analysis templates Accessories: 150 mm square sample insert for 300 mm shearbox Data processing software: Direct and residual geo-analysis templates conforming to BS 1377:7s
