

Product Name :
Filed Density Test

Product Code :
TEST5194RFQLAB-0028

Description :

Filed Density Test

Technical Specification :

Filed Density test

Double cone: 4"(101.6 mm) diameter sand density cone apparatus: calibrating container. Weight: 5kg

Plastic sand jar 6.5"(165.1 mm) diameter sand density:standard sand, 0.3 to 0.6 mm grain size, Cone apparatus:

Weight:50 kg

Sack metal base plate with flanged: 12"(304.8 mm) diameter sand density:standard sand, 0.4 to 2.0 mm grain size, cone apparatus. Weight:50 kg sack

Ballon density apparatus: Ballon density apparatus, 3000 ml capacity: Spare reinforced 3000 ml membranes. 9.5 kg

Ballon density apparatus, 6000 ml capacity: Spare reinforced 6000 ml membranes. 11.5 kg
