Product Name :
Thermometer

Product Code :
TEST5195RFQLAB-0006

Description :

Thermometer

Technical Specification :

Our laboratory thermometers will be applicable in all sectors of technology and science, in which especially precise temperature measurements be in progress.

The stem types have the graduation indestructibly diffused into the glass surface and are acid- and alkali-resistant.

The enclosed-scale versions each have a prismatic capillary that allowed a better reading.

The enclosed type is implemented with a prismatic capillary that enables improved reading.

Measurement method: Analog

Temperature range: Max.: 50 °C (122 °F)

Min.: 0 °C (32 °F)
