

Product Name :
Water Bath

Product Code :
TEST5195RFQLAB-0035

Description :

Water Bath

Technical Specification :

The combination of corrosion-resistant stainless steel, precise electronics and multiple temperature protection guarantees the highest level of safety in the laboratory.

All-round surface heating: The extensive all-round heating over three sides forms the basis of excellent temperature distribution.

Stainless steel: Beautiful and functional. Memmert stainless steel is scratch resistant, hygienic, robust and everlasting.

Safety: Excellent water baths: electronic temperature monitoring, mechanical temperature limiter and integrated auto-diagnostic system.

Multiple temperature protection.

Extensive all-round heating over three sides.

Electronic temperature monitoring, mechanical temperature limiter and integrated autodiagnostic system.
