

Product Name :
Echo Sounder Trainer Systems

Product Code :
TEST5196RFQLAB-0001

Description :

Echo Sounder Trainer Systems for Testing Lab Equipment Tender Suppliers India

Technical Specification :

Purpose:

To demonstrate the trainees for practical work and impart the knowledge about:
Echo sounding is a type of sonar used to determine the depth of water.
Transmitting acoustic waves in water.
The time interval between emission and return of a pulse is recorded

Environmental Condition:

Ambient Temperature: 5° C to 50° C.
Storage Temperature : To be mentioned.
Relative Humidity: Up to 95% non-condensing.
Scope of Supply: 01x Echo Sounder with accessories

Technical Specification:

Operating Frequency: 50KHz to 200KHz
Weight: 8.5 Kg
Display Size: 10.4" Color TFT LCD
Echo Color: 8 Colors or 8 Level Monochrome
Alarm Function: Depth, Power Fail, System Error
Draft Adjust: 50m in 0.1m steps

Range: 10, 20, 50, 100, 200, 500, 800m
Power Supply: 24V DC
Power Consumption: Less than 50W.
