

Product Name :
Film Stripping Device Electrically Operated

Product Code :
TEST5088RFQLAB-0001

Description :

Film Stripping Device Electrically Operated for Testing Lab Equipment Tender Suppliers India

Technical Specification :

For determining the resistance of bituminous mixture to stripping of the asphalt from aggregate particles and for judging the adhesive capacity of bituminous material. Applied to aggregate fraction passing 9.525 mm sieve and retained on No.8 Sieve.

It consists of a disc on which four bottles are mounted. The disc rotates at a rate of 100 r.p.m. approx. The sample is kept in bottles and agitated for 15 minutes. The percentage of aggregate stripped is estimated by visual observation. Provided with a time switch.

Suitable for operation on 220 V, 50 Hz, single phase supply.

We are a leading manufacturers of Film Stripping Device Electrically Operated testing equipment for a range of industries, including materials science testing lab. We offer full range of Film Stripping Device Electrically Operated testing equipment, including Film Stripping Device Electrically Operated testing kit, Film Stripping Device Electrically Operated testing machine, Film Stripping Device Electrically Operated testing tools, Film Stripping Device Electrically Operated test equipment, Film Stripping Device Electrically Operated test machines, Film Stripping Device Electrically Operated for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Film Stripping Device Electrically Operated testing equipment that helps customers build better, safer, and more sustainable infrastructure.
